

Federal Aviation Administration

Community Involvement — South Central Florida

Status of Engagement: Design

The South-Central Florida Metroplex effort is in the procedure Design Phase. The purpose of the project is to optimize procedures and improve air traffic flow on a regional scale by analyzing current operational challenges and exploring opportunities for improvement. The Design Team is developing proposed updates to current arrival and departure procedures. With data collected during the project's Study Phase, the FAA is working to increase efficiency and improve operations in your area while taking into account how these changes may affect your community.

Public Workshops

The FAA is planning a series of public workshops in April and May of 2019 to gather public input on the proposed changes. At the workshops, the public will be able to see the proposed paths and expected altitudes of these preliminary designs. The public will also be able to discuss the proposals with Subject Matter Experts and provide feedback. Public comments will be accepted at each workshop and through an online link, which will be available on this webpage for 30 days from the date of the last meeting in that city.

Upon completion of the Design Phase, the project will enter the Evaluation Phase where the procedure designs will be refined as necessary and the environmental review under the National Environmental Policy Act (NEPA) will begin. The FAA will then provide an additional opportunity for comment and conduct additional public workshops to present the design proposals and the Draft Environmental Assessment. The Agency will review and consider all comments received.

As development progresses, we will update this page with details from past and upcoming meetings. For more information on the South-Central Florida Metroplex, please visit the links below.

South-Central Florida Upcoming Public Workshops

Public Workshop – Ft. Lauderdale

Time:

April 23, 2019 – 6:00 p.m. to 9:00 p.m.
